THE LocoScript 2 Family

Better word processing on your PCW8256/8512

LocoScript 2

The faster, better word processing system – and the key to giving your PCW even more power by use of these additional programs.

LocoScript 2: £24.95
LocoScript 2 and LocoSpell: £34.90

LocoFile

A system for storing names and addresses or other data on a series of 'cards' – which can be called up on screen whenever required. With LocoFile it's easy to incorporate your data in documents, print address labels, and so on.

LocoFile: £29.95

LocoMail

A program for creating standard letters, documents, reports etc, which you fill with the appropriate information – either manually or automatically from data stored on disc. LocoMail is the perfect adjunct to LocoFile

LocoMail: £29.95

LocoSpell

A fully integrated spelling checker, available in a range of national languages – English, US English, French, German, Italian and Spanish. It also has a word count facility.

LocoSpell: £19.95

LocoFont

A range of different typefaces in which to print your documents. The typefaces available range from 'handwriting' styles to modern fonts for business use.

LocoFont Set 1: £19.95
**Set 2: £14.95**
LocoFont 24 Text Set: £24.95
Display Set: £24.95

Printer Drivers

Extra programs that enable you to use a wide range of different printers to print your LocoScript documents – from typewriters to sophisticated laser printers. Over 300 different printer models are supported.

Printer Drivers Disc: £19.95
24 Pin Printer Drivers Disc: £24.95

LocoScript 2

The first step in getting more from your Amstrad PCW8256 or 8512:

- **Faster to operate**
- **Easier to use - comes with new User Guide, too**
- **Improved features**
- **More characters & symbols**
- **Lets you use different printers**

What's more, LocoScript 2 also opens the door to a whole host of other programs from the LocoScript family, adding even more power to your PCW.

Programs like...

LocoFile

A system for storing data on a series of 'cards' – which are kept in order and can be called up on screen whenever required. The information can then be updated, printed out, or copied – in whole or in part – to another document.

Use LocoFile at home or work to:

- **Keep a computerised address book**
- **Index books, abstracts, photos, records etc.**
- **Record customer orders or sales information**
- **Maintain staff records**
- **Print address labels or to keep a personal organiser up-to-date**

LocoMail

A program for creating standard letters, documents, reports etc, which you fill with the appropriate information – either manually or automatically from data stored on disc. Use it with either special 'LocoMail' datafiles, your LocoFile data or CP/M programs such as accounts.

LocoMail can also select, do calculations and repetitive tasks, making it ideal for:

- **Creating targetted mailshots**
- **Sending out subscription reminders**
- **Producing invitations or addressing Christmas cards**
- **Raising invoices and producing monthly statements**

LocoFile and LocoMail together

Whilst each program is complete in itself, LocoFile and LocoMail together create a very powerful combination.

LocoFile provides the facilities you need to organise and maintain your data. LocoMail lets you use your data in all sorts of documents.

Add LocoMail's arithmetic capabilities and you can create letters, invoices, reports, labels etc. – neatly sorted into order thanks to LocoFile and perfectly prepared thanks to LocoMail.

LocoSpell

A fully integrated spelling checker, available in a range of national languages – English, US English, French, German, Italian and Spanish. It also has a word count facility.

Use LocoSpell to:

- **Spot typing errors in your work.**
- **Look up the spelling of difficult words,**
- **Count the words in all or part of a document**

LocoFont and LocoFont 24

A range of different typefaces in which to print your documents. The typefaces available range from 'handwriting' styles to modern fonts for business use. All except Old English let you print the full range of LocoScript characters.

- **Use LocoFont on the PCW8256/8512's printer to print invitations in a flowing 'script' style or official letters in a formal 'business' style.**
- **Use LocoFont 24 with the 24 Pin Printer Drivers on a suitable 24 pin matrix printer to give similar results – but better and faster.**

Printer Drivers

Extra programs that enable you to use a wide range of different printers to print your LocoScript documents – from typewriters to sophisticated laser printers. Over 300 different printer models are supported. What is more, these Printer Drivers allow you to extend the range of printer features you can use in printing your documents. As a rule, if both the printer and LocoScript support a particular print effect, then the correct Printer Driver will allow you to use this effect in printing your documents.

- **Use the standard set of Printer Drivers to print using your printer's built-in set of characters and fonts.**
- **Use the special set of '24 Pin Printer Drivers' with a suitable 24 pin dot-matrix printer to print the full range of LocoScript 2's characters.**
